VETERINARY SERVICES AND ANIMAL HEALTH

**Official Certification of Plants  
Producing oils and fats for animal feed intended for Export to Israel**

I, the undersigned Official Veterinarian hereby certify that,

The processing plant (name):

Located at (address, approval number, city, state, and zip code):

1. Is certified by the Veterinary Services of this country as a processing plant and is supervised by an official or accredited veterinarian.
2. Manufactures on its premises oils and / or fats containing animal origin ingredients of the following species:
3. Manufactures fats and /or oils in accordance with exporting country laws and regulations which may be freely sold for animal feeding in the said country, complying with approved good manufacturing practice.
4. The raw materials utilized for the production of the fats and /or oils to be exported to Israel are all of local (producer country) origin only (excluding fish).
5. The finished product does not contain and is not contaminated with commodities that should not be traded as defined in the B.S.E. chapter of the OIE terrestrial animal health code.<sup>(1)</sup>

---

1. Article 11.5.14 OIE Terrestrial Animal Health Code, 2010: Recommendations on commodities that should not be traded

1. Tonsils and distal ileum from cattle of any age from a controlled or undetermined BSE risk country, zone, or compartment.
2. brains, eyes, spinal cord, skull and vertebral column from cattle that were, at the time of slaughter over 30 months of age originating from a controlled BSE risk country, zone, or compartment.
3. brains, eyes, spinal cord, skull and vertebral column from cattle that were, at the time of slaughter over 12 months of age originating from a undetermined BSE risk country, zone, or compartment.

Article 11.5.13 OIE Terrestrial Animal Health Code, 2010: Recommendation on ruminant-derived meat-and-bone meal or greaves

1. Ruminant-derived meat-and-bone meal or greaves from a negligible BSE risk country where there has been an indigenous case of BSE, should not be traded if such products were derived from cattle born before the date from which the ban on the feeding of ruminants with *meat-and-bone meal* and *greaves* derived from ruminants had been effectively enforced.
2. Ruminant-derived meat-and-bone meal or greaves from a controlled or undetermined BSE risk country, zone, or compartment.

6. Tests random samples taken during or after storage, from each processed batch for enterobacteriaceae and Salmonella spp. in accordance with the following standards prior to export <sup>(2)</sup>:

Salmonella: absence in 25 g: n = 5, c = 0, m = 0, M = 0

Enterobacteriaceae: n = 5, c = 2, m = 10, M = 300 in 1 g.

7. Have precautions in place to prevent the contamination of finished product with pathogenic agents following processing.

2. here:

n = number of samples to be tested;

m = threshold value for the number of bacteria: the result is considered satisfactory if the number of bacteria in all samples does not exceed m;

M = maximum value for the number of bacteria; the result is considered unsatisfactory if the number of bacteria in one or more samples is M or more; and

c = number of samples the bacterial count of which may be between m and M, the sample still being considered acceptable if the bacterial count of the other samples is m or less.
